PROFESSIONAL SUMMARY

Frontend Developer specializing in SaaS applications, analytics dashboards, workflow automation, and data-driven user experiences using React, JavaScript, TypeScript, TailwindCSS, and API integrations. Built and deployed production-style web applications including CRM platforms, workforce intelligence dashboards, recommendation systems, and automation tools.

PROFESSIONAL EXPERIENCE

Python Engineer / Web Development Contractor

2025 – Present

ZeroHour1918

- Collaborated on SEO and web development projects involving automation tooling, frontend debugging, workflow optimization, and technical problem-solving.
- Developed Python scripts to automate repetitive operational tasks and improve workflow efficiency.
- Assisted in debugging and optimizing website code across multiple client projects.

Independent Project Manager

2020 – Present

Leviathan Steel

- Managed independent technical projects from planning through execution.
- Coordinated client communication, procurement, scheduling, budgeting, and project delivery.

Data Science Intern

2024

Megadel Africa

Remote, Kenya

- Designed predictive models to support data-driven decision-making.
- Developed interactive dashboards to improve stakeholder visibility and understanding.
- Collected and prepared data from APIs, web scraping pipelines, and market research sources.

EDUCATION

Data Science Bootcamp

2024

GoMyCode

B.Sc. Human Physiology

2015

Delta State University

TECHNICAL SKILLS

Frontend

React, JavaScript, TypeScript, HTML5, CSS3, TailwindCSS

Tools

Git, GitHub, Vercel, Chrome DevTools, VS Code

Backend & Data

Python, Flask, SQL, PostgreSQL, REST APIs, Supabase

Data & Analytics

Data Analysis, Data Visualization, Machine Learning Fundamentals, Dashboard Development, Web Scraping

CERTIFICATIONS

Data Science Bootcamp Certificate

2024

Welding & Fabrication Proficiency Certification

2021

Welding & Metal Fabrication Apprenticeship Program

2019

PROJECTS

LeadPilot

SaaS CRM & Lead Intelligence Platform | React • TypeScript • TailwindCSS • Supabase

Built a startup-focused CRM platform for lead tracking, outreach management, workflow monitoring, and business intelligence.

Workforce Intelligence Dashboard

React • TypeScript • TailwindCSS • Recharts

Built a workforce analytics platform featuring hiring pipelines, employee management, KPI tracking, and operational reporting.

Mood-Flix

AI-Powered Movie Discovery Platform | React • TypeScript • TailwindCSS • TMDB API

Built a cinematic movie discovery experience powered by emotion-driven recommendation flows.

Movie Recommendation System

Python • Flask • Machine Learning

Developed a machine-learning-powered recommendation engine for personalized movie suggestions.

Lead Generation Automation CLI

Python • Automation

Built a command-line automation tool that extracts business information and generates prospect datasets.
